

## CERTIFICATION OF LEED COMPLIANCE

### RE: Recycled Steel Content

LUX Architectural Products believes in the importance of sustainability and minimizing the environmental footprint of its products, facilities, and services. Due to this commitment, we are pleased to provide information regarding the recycled content of our products.

This document is to certify that LUX Architectural Products uses both pre-consumer and post-consumer of recycled ferrous scrap in the manufacture of ASTM A792 (55% Al-Zn Alloy Coated Steel) and ASTM A653 (Hot-Dip Galvanized Steel). The actual recycled content can vary widely from a minimum of 20% (approximate Internal scrap percentage) to a maximum of 80% in accordance with the methods used to produce steel.

ITEM	RECYCLED CONTENT			NON-RECYCLED
	PRE-CONSUMER	POST-CONSUMER	TOTAL	
ASTM A792	5%	15%~20%	20%~25%	75%~80%
ASTM A653	5%	15%~20%	20%~25%	75%~80%

If you have questions, please do not hesitate to contact LUX Architectural Products.
